

Counterfactual flip rate: **-49%** / **-55%** / **-73%** across three architectures

Model C baseline

CCI v2 (ours)

CCI v2 cuts hard CFR by 49–73% on three architectures (DeBERTa-base; same-family DeBERTa-large; cross-family RoBERTa-large). 6 seeds each. Mean $\pm$ std. All within-architecture comparisons reject Holm-Bonferroni 6/6.
